

Marcos Moreno Martínez

AI Engineering Leader

I build AI teams that ship: taking computer vision and ML from research to production.

marcosmoreno.of@gmail.com · [LinkedIn](#) · [GitHub](#) · marcosmoreno-ai.github.io · Alicante, Spain

SUMMARY

AI Tech Lead with 6 years at VRAiA in industrial automation, now leading a 5-person team across Computer Vision and AI Agents. I grew from hands-on computer vision — 30+ deep-learning models (CNNs and Vision Transformers) in production — into technical leadership. I work where AI delivery actually breaks: people, communication and process — technically solid enough to earn the team's trust, and organizationally aware enough to keep delivery moving. Currently going deeper into AI Agents with LangChain and LangGraph. C1 English.

EXPERIENCE

AI Tech Lead

Oct 2024 – Present

VRAiA Elche, Spain · Hybrid

- Lead a 5-person AI team spanning Computer Vision and AI Agents, bridging hands-on technical work and team coordination.
- Technical oversight of production computer vision systems running 30+ deep-learning models (CNNs and Vision Transformers).
- Drive strategic technical decisions across computer vision and MLOps; plan projects and run stakeholder meetings.
- Introduced tooling standards (uv, ruff, MLflow) that improved consistency and reduced friction across the team.
- Resolved critical AI-IT breakdowns — cuDNN / ONNX / TensorRT misalignments that had blocked production deployments for months.
- Review code and pull requests, and stay hands-on with model training, validation and architecture optimization.

Deep Learning & Computer Vision Engineer

May 2022 – Oct 2024

VRAiA Elche, Spain · Hybrid

- Took full ownership of computer vision projects after a team restructure, running segmentation and classification workstreams in parallel.
- Fine-tuned architectures such as U-Net and CNN-based classifiers for image segmentation and classification.
- Implemented MLflow for experiment tracking; selected and validated models for production.
- Optimized models via ONNX and mixed-precision training in TensorFlow; coordinated with IT for TensorRT production deployment.
- Refactored a legacy classification codebase; mentored a new engineer with no prior professional programming experience and trained labelers in dataset methodology plus basic Python and SQL.

Junior Deep Learning & Computer Vision Engineer

May 2020 – May 2022

VRAiA Aspe, Spain · On-site

- First production AI experience. Joined during a critical deployment phase; before repo access, built Python tooling to automate repetitive labeling and a prototype app to manage dataset splits — later the basis for an internal tool.
- Moved into model fine-tuning and experimentation with TensorFlow.
- First experience with production deployment pipelines (.pb format, IT integration).

Computer Vision Engineering Intern

Mar 2019 – May 2019

CFZ Cobots Elche, Spain · On-site · Internship

- University engineering internship; first hands-on exposure to industrial computer vision.
- Software testing with Omron FH Series industrial cameras and Intel RealSense depth cameras in Python.

TECHNICAL SKILLS

ML & Deep Learning	Python, TensorFlow, Keras, PyTorch, OpenCV, NumPy, pandas, scikit-learn, ONNX, ONNXRuntime
Computer Vision	CNNs, U-Net, Vision Transformers, SAM — segmentation & classification
MLOps & Tooling	MLflow, uv, ruff, Git, Gitea, WSL, Ubuntu
Infrastructure & Data	CUDA, cuDNN, NVIDIA multi-GPU, mixed-precision training, PostgreSQL, Ceph, Docker
AI Agents	LangChain, LangGraph

EDUCATION

Bachelor's Degree in Robotics Engineering 2015 – 2019
University of Alicante

- Final Thesis: outdoor assistance app for visually impaired pedestrians, working in any lighting condition.
Tools & Languages: Android, YOLOv3, Darknet, Flask, OpenLabeling, Python, C, Java.

CERTIFICATIONS & ACHIEVEMENTS

- **C1 Advanced (CAE) — Cambridge**, 2021 — maintained through weekly speaking practice
- **Deep Learning Specialization** — DeepLearning.AI (Andrew Ng), 2021
- **GANs Specialization** — DeepLearning.AI, 2022
- **LangChain Essentials & LangGraph Essentials** — LangChain Academy, 2026
- **Python for Data Science & Machine Learning Bootcamp**, 2020
- Grew from Junior to AI Tech Lead at **VRAiA** in under 5 years
